SUMMARY

I build AI-powered products end to end: React and Node.js interfaces, Python and FastAPI services, and LLM pipelines that stay reliable through schema-validated output, provider fallback, and audit logs. I turn unclear customer requirements into live features, and have shipped a multi-role SaaS used by real customers and a multi-agent contract-review system. For a team, that means one engineer who can take a feature from customer conversation to deployed code.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, SQL
Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3
Backend & APIs: Node.js, Express.js, FastAPI, REST, GraphQL, JWT Authentication, RBAC
Databases: PostgreSQL, MongoDB, Redis, Supabase
AI & LLM: OpenAI GPT-4, Google Gemini, Groq (Llama 3.1), LangChain, RAG, Multi-Agent Systems, Prompt Engineering, Structured JSON Output
Cloud & DevOps: AWS (EC2, S3), Azure (App Service), Docker, GitHub Actions, Azure DevOps, CI/CD, Vercel, Render
Testing & Practices: Vitest, Supertest, Git/GitHub, Agile/Scrum
Soft Skills: Customer Communication, Requirements Gathering, Client Collaboration

EXPERIENCE

Full Stack Developer – Highbrow Technosoft Pvt. Ltd., Pune *Sep 2025 – Present*
- Work directly with customers and the co-founder to clarify requirements and ship full-stack features (React, TypeScript, Node.js) for live client applications.
- Integrated OpenAI GPT-4 and Google Gemini APIs into live applications for smart suggestions, form auto-fill, and AI content generation.
- Designed REST and GraphQL APIs with JWT authentication and RBAC; used Supabase and Redis for real-time data, caching, and faster auth flows.
- Configured CI/CD pipelines with GitHub Actions and Azure DevOps for automated deployments to AWS EC2 and Azure App Service.

AI/ML Technical Trainer (Part-Time) – Technical One, Pune *Oct 2025 – May 2026*
- Designed and taught an ML and agentic AI curriculum for 50+ learners alongside full-time work.
- Covered LLM fundamentals and multi-agent workflows, and mentored teams through production-style projects.

Full Stack Developer Intern – The Developers Arena, Remote *Mar 2025 – Aug 2025*
- Implemented authentication flows and REST APIs with Node.js, Express.js, and Supabase.
- Integrated the Gemini API to add AI-assisted content features to the application.

Full Stack Developer Intern – Technical One, Pune *Jul 2024 – Dec 2024*
- Delivered modular full-stack components on an MVC architecture.
- Integrated PostgreSQL and MongoDB, improving response time by 20%.

PROJECTS

Laundrix – Laundry Management SaaS | React, Node.js, PostgreSQL, WhatsApp API **GitHub | Live Site**
- Delivered a live multi-role platform (Admin, Owner, Staff, Customer) used by real customers, covering the booking lifecycle, RBAC, and real-time order tracking.
- Implemented OTP-based staff authentication, subscription management, an invoice lock system, an analytics dashboard, and WhatsApp order notifications.

AI Interview Prep Kit | TypeScript, Node.js, Next.js, MongoDB, Gemini, Groq **GitHub | Live Site**
- Engineered a staged LLM pipeline (requirement extraction, company research, question generation, gap filling) with schema-validated JSON output and Gemini-to-Groq fallback.
- Added deterministic coverage checks, a batch evaluation CLI, Vitest/Supertest tests, JWT authentication, and API rate limiting; deployed live.

AI Contract Intelligence Platform (Freelance) | Python, FastAPI, LangChain, PostgreSQL **GitHub**
- Architected a multi-agent system (Worker, Verifier, Approval) that automates enterprise contract review, with observability, audit logging, and exception handling.

AI Intake Agent – CRM Automation | Python, FastAPI, PostgreSQL, Gemini, Groq, Streamlit **GitHub | Live Demo**
- Designed a multi-stage LLM pipeline (validation, classification, priority, decision, message generation) that converts messy CSV records into CRM-ready payloads, with Gemini-to-Groq fallback.
- Exposed REST APIs with FastAPI; stored records, AI reasoning logs, and processing logs in PostgreSQL for a full audit trail; added a Streamlit dashboard.

EDUCATION

B.E. in Information Technology – Amrutvahini College of Engineering, SPPU *2021 – 2025 | CGPA 8.08*

CERTIFICATIONS & ACHIEVEMENTS

- Finalist – CIMET AI Hiring Hackathon (HackCulture)
- AWS Fundamentals – Simplilearn
