NILESH KONDIRAM PULATE

Software Engineer

+91-8767542209 • nileshpulate87@gmail.com • Pune, India • LinkedIn • GitHub • Portfolio

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java
Frontend: React.js, Angular, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, Streamlit, Responsive Design
Backend: Node.js, Express.js, FastAPI, REST APIs, GraphQL, JWT Auth, RBAC, MVC Architecture, WebSockets, Middleware
Databases: MongoDB, PostgreSQL, MySQL, Supabase (Realtime + Auth), Redis, ChromaDB, Pinecone (Vector DBs), Prisma ORM
AI / LLM: OpenAI GPT-3.5/GPT-4, LLAMA 2, Groq API, Agentic AI, Multi-Agent AI, RAG Pipelines, LangChain, n8n, Prompt Engineering
ML / Models: TensorFlow, scikit-learn, Random Forest, Decision Tree, Logistic Regression, XGBoost, NLP, Feature Engineering, EDA
Cloud & DevOps: AWS (EC2, S3), Azure (App Service, Blob Storage), Docker, GitHub Actions, Azure DevOps, Vercel, Render, Netlify, CI/CD
Tools: Git, GitHub, GitHub Copilot, n8n, Agile/Scrum, Postman, Power BI, Google Colab, Jupyter, Pandas, NumPy, OOP, DSA
Emerging Tech: LangGraph, CrewAI, MCP (Model Context Protocol), Ollama, Vector Search, LLM Fine-Tuning, Kubernetes, Bun, Next.js 14, WebAssembly

WORK EXPERIENCE

Full Stack Developer - Highbrow Technosoft Pvt. Ltd., Pune — Sep 2025 – Present

- Architected and shipped production-ready MERN applications end-to-end for live clients, improving feature delivery efficiency by **30%** through modular service-layer architecture and optimized MongoDB query design.
- Engineered secure RESTful APIs for real-time workflows and high-volume transactions; enforced **JWT authentication** and RBAC across all endpoints.
- Owned complete feature lifecycle from system design through AWS cloud deployment, performance monitoring, and post-release maintenance in Agile sprints.

AI/ML Trainer (Part-Time) - Technical One, Pune — Oct 2025 – May 2026

- Designed and delivered end-to-end ML curriculum covering data preprocessing, feature engineering, model training, LLM basics, and Agentic AI to **50+ learners**; conducted code reviews improving project quality.
- Mentored learners in deploying production-ready AI apps using Python, OpenAI API, and Streamlit; achieved **90%+ project completion rate** across all cohorts.

Full Stack Developer Intern - The Developers Arena, Remote — Mar 2025 – Aug 2025

- Developed and deployed full-stack MERN features with REST API and JWT integration supporting thousands of live user sessions; resolved backend bottlenecks reducing API response latency.

Full Stack & AI/ML Engineer (Multiple Roles) - Technical One, YBI Foundation, Sumago Infotech & Techplement — 2024 – 2025

- Delivered modular MERN components, REST API integrations, and RBAC authentication flows across multiple internships, improving application performance, maintainability, and development velocity.
- Built and evaluated predictive ML models using feature engineering, EDA, and metric-driven optimization on real-world datasets; documented findings for stakeholder reporting.

KEY PROJECTS

Laundrix - Laundry Management System | React.js · Node.js · PostgreSQL · JWT · Google Maps API · WhatsApp API [Live] [GitHub]

- Production-ready **multi-role SaaS platform** (Admin, Owner, Staff, Customer) with full booking lifecycle - self-drop & door-to-door pickup, RBAC, staff assignment, real-time tracking, and PDF invoice with GST support.
- Implemented OTP-based customer login, triple-credential staff auth, subscription management with 3-month free trial, invoice lock system, analytics dashboard, and **WhatsApp Business API** for automated notifications.

AI Enterprise Contract Intelligence Platform | Python · FastAPI · Groq API · Multi-Agent AI · PostgreSQL [GitHub]

- Built a **production-ready multi-agent AI system** orchestrating Worker, Verifier, Approval, Replay, and Exception agents to automate enterprise contract review - risk analysis, clause extraction, compliance checking, and approval workflow.
- Implemented **AI Observability** with full agent trace logging (model, tokens, cost, latency), audit logs for every business action, exception queue for failure handling, and analytics dashboard - enterprise-grade AI governance.

Ingreedy - Recipe Finder App | React.js · TypeScript · Node.js · RapidAPI · Supabase · OpenAI API [Live] [GitHub]

- Full-stack recipe search platform with diet and ingredient-based filtering via RapidAPI; AI-powered suggestions using OpenAI API and Supabase for saved favourites & user auth - deployed live on Vercel.

PDF Malware Detection System | Python · Random Forest · scikit-learn · Pinecone · Streamlit [Live] [GitHub]

- ML-based malware classifier using 15+ PDF metadata features with Random Forest; Pinecone vector DB for feature embedding storage - deployed as Streamlit web app with real-time malicious/safe prediction.

EDUCATION

B.E. in Information Technology - Amrutvahini College of Engineering, SPPU | 2021–2025 | CGPA: **8.08**

CERTIFICATIONS

Data Analytics with Python - NPTEL • AWS Fundamentals - Alison/Simplilearn • Java Programming - Great Learning • Web Development with Python - Innovations Hub
