PROFESSIONAL SUMMARY

Full Stack Software Engineer and AI/ML Developer with 2+ years of experience delivering production-grade MERN applications, scalable REST APIs, and AI/ML-integrated systems across 8 engineering roles. Achieved **30% faster feature delivery** through modular backend architecture. Built **55+ applications** including 45+ ML models using Python, TensorFlow, and scikit-learn. Proficient in OpenAI GPT-4, LLAMA 2, RAG Pipelines, LangChain, Angular, TypeScript, GraphQL, AWS, Azure, Docker, Supabase, and Redis. Targeting Full Stack, Backend, and AI/ML Engineering roles.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python, Java
Frontend:	React.js, Angular, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, Streamlit, Responsive Design
Backend:	Node.js, Express.js, REST APIs, GraphQL, JWT Auth, RBAC, MVC Architecture, WebSockets, Middleware, API Integration
Databases:	MongoDB, PostgreSQL, MySQL, SQL, Supabase (Realtime + Auth), Redis (Caching & Sessions), Prisma ORM
AI / LLM:	OpenAI GPT-3.5 & GPT-4 API, LLAMA 2, Agentic AI, RAG Pipelines, Prompt Engineering, LangChain, AI Agents, LLM Integration
ML / Data:	TensorFlow, scikit-learn, NumPy, Pandas, Matplotlib, NLP, Feature Engineering, Hyperparameter Tuning, EDA
Cloud & DevOps:	AWS (EC2, S3), Azure (App Service, Blob Storage), Docker, GitHub Actions, Azure DevOps, Vercel, Render, Netlify, CI/CD
Tools:	Git, GitHub, Agile/Scrum, Postman, Power BI, Google Colab, Jupyter, OOP, DSA, Code Reviews

WORK EXPERIENCE

Full Stack Developer — Highbrow Technosoft Pvt. Ltd., Pune *Sep 2025 – Present*

- Architected and shipped production-ready MERN applications end-to-end for live clients, improving feature delivery efficiency by **30%** through modular service-layer architecture and optimized MongoDB query design.
- Engineered secure RESTful APIs for real-time workflows and high-volume transactions; enforced JWT authentication and RBAC across all endpoints.
- Owned complete feature lifecycle from system design through AWS cloud deployment, performance monitoring, and post-release maintenance in Agile sprints.

AI/ML Trainer (Part-Time) — Technical One, Pune *Oct 2025 – May 2026*

- Designed and delivered end-to-end ML curriculum covering data preprocessing, feature engineering, model training, LLM basics, and Agentic AI to 50+ learners; conducted code reviews improving project quality and completion rates.
- Mentored learners in deploying production-ready AI apps using Python, OpenAI API, and Streamlit; achieved **90%+** project completion rate across all cohorts.

Full Stack Developer Intern — The Developers Arena, Remote *Mar 2025 – Aug 2025*

- Developed and deployed full-stack MERN features with REST API and JWT integration supporting thousands of live user sessions; resolved backend bottlenecks reducing API response latency.

Full Stack & AI/ML Engineer (Multiple Roles) — Technical One / YBI Foundation / Sumago Infotech / Techplement, Pune / Nashik *2024 – 2025*

- Delivered modular MERN components, REST API integrations, and RBAC authentication flows across multiple internships, improving application performance, maintainability, and development velocity.
- Built and evaluated predictive ML models using feature engineering, EDA, and metric-driven optimization on real-world datasets; documented findings for stakeholder reporting.

KEY PROJECTS

Laundrix – Salon Booking System | React • TypeScript • Node.js • Express • MongoDB • JWT • REST API [Live] [GitHub]

- Production-ready multi-role SaaS platform (Admin, Owner, Staff, Customer) with full booking lifecycle — self-drop & door-to-door pickup, RBAC, staff assignment, real-time order tracking, and PDF invoice generation with GST support.
- Implemented OTP-based customer login, triple-credential staff auth, subscription management with 3-month free trial, invoice lock system, analytics dashboard, and **WhatsApp Business API** for automated order & holiday notifications.

Ingreedy – Recipe Finder App | React.js • TypeScript • Node.js • RapidAPI • Supabase • OpenAI API [Live] [GitHub]

- Full-stack recipe search platform with diet and ingredient-based filtering via RapidAPI; AI-powered suggestions using OpenAI API and Supabase for saved favourites & user auth.
- Optimized API response handling with dynamic multi-filter state management delivering fast, seamless UX — deployed and live on Vercel.

RAG Chatbot | Python • LangChain • ChromaDB • Ollama • Streamlit [GitHub]

- Built a Retrieval-Augmented Generation (RAG) chatbot for PDF Q&A — extracts text, chunks, generates embeddings, stores in **ChromaDB** for semantic search.
- Integrated Ollama-hosted local LLM (TinyLlama/Llama3) for private offline inference — full pipeline: PDF upload → chunking → embedding → retrieval → answer generation; **85–90% accuracy**.

PDF Malware Detection System | Python • Random Forest • scikit-learn • Streamlit [Live] [GitHub]

- ML-based malware classifier using 15+ PDF metadata features with Random Forest; high-accuracy model evaluation with feature importance analysis and hyperparameter tuning.
- Deployed as real-time Streamlit web app on Render — users upload any PDF and receive instant malicious/safe prediction with confidence score.

EDUCATION

B.E. in Information Technology — Amrutvahini College of Engineering, SPPU *2021–2025 | CGPA: 8.08*

CERTIFICATIONS

• **Data Analytics with Python** — NPTEL • **AWS Fundamentals** — Alison / Simplilearn • **Java Programming** — Great Learning • **Web Development with Python** — Innovations Hub
